 CAMEX

INTRODUCTION

Welcome to CAMEX Technologies, we are one of the largest and most trusted electrical panel board manufacturers in the entire South India. CAMEX Technologies was brought to life through the concept and ideology of **Mr. C S Prasad and Mr. Shiju T Mohandas in 2014**. And, in less than a decade, CAMEX Technologies has grown to become the most preferred electrical panel board manufacturers for both private and government projects across South India.

ABOUT CAMEX TECHNOLOGIES

CAMEX Technologies is quite famous across South India and are slowly expanding its borders to other parts of the country. The key factors differentiating CAMEX Technologies from our counterparts in our industry are as follows:

IMPROVING LIVES, BUILDING A BETTER WORLD

CPRI certified
for highest ratings

IEC 61439 Part 1&2
Rated PTTA Panels

ISO 9001 : 2015
Certified

ZED Certified

Inhouse 11 tank
Powder Coating Plant

OEM integrators of
Schneider Electric & Siemens

We are, CPRI certified electrical panel board manufacturing unit with highest ratings in 5000A short circuit @50KA, 4000A Temperature rise and IP55 rated enclosures.

We are a certified OEM partner for Schneider Electric as an EcoXpert LV Panel Partner and are authorised to assemble, test and sell all PrismaSet International products.

Camex is manufacturing 100% modular / bolted panels / welded panels with a robust design which allows default expansions / customization facilities.

We have inhouse powder coating facility with most modern technology base backed with 11 tank pre-treatment process.

We are a certified OEM partner of Siemens to manufacture HT panels up to 36KV and can offer IPAN/IVAC product solutions.

All Camex panels are certified for PTTA construction as per latest IEC 61439 1 & 2 standards.

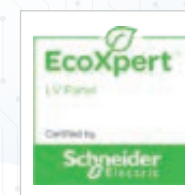

We are an ISO 9001: 2015 certified manufacturing plant.

We are ZED Certified.

Approved OEM and
Sale Partners For:

OUR FACILITY

The CAMEX Technologies facility is a matter of pride for all its stakeholders. With an approximate area of 30, 000 Sq. Ft, the factory alone is perhaps one of the largest electrical panel board manufacturing unit across South India.

The factory is monitored by a sound ERP system which helps monitor and control every stage of design to completion stage in the production process.

30, 000 SQ. FT FACTORY AREA

ONE OF THE LARGEST ELECTRICAL PANEL BOARD MANUFACTURING UNIT ACROSS SOUTH INDIA

We maintain high standards in factory safety and workplace hygiene by ensuring round the clock facility management support from trained professionals.

Our factory floor has designated walkways and is designed in a controlled environment maintained with high tech white epoxy coated flooring to retain the highest levels of quality equal to any International factory. Furthermore, our factory has a fully equipped EOT crane to ensure utmost care in product handling.

OUR MANUFACTURING PROCESS

At CAMEX Technologies, we leverage state – of – the – art technology and precision engineering to craft fully customized and ready to install electrical panel boards that meet the highest standards of safety and quality prescribed by all regulatory authorities. Our commitment to innovation ensures that our products are the best as per industry standards. Our latest advanced machines includes 5 Axis CNC press brake, laser cutting machine, bus bar bending machine etc... which are used extensively in our production line.

Our in- house 11 tank powder coating facility uses only the most advanced technology in ensuring the highest quality products are delivered by CAMEX Technologies after undergoing stringent testing measures.

HIGHEST STANDARDS OF SAFETY AND QUALITY

Quality is the cornerstone of our operations.

- Every product manufactured at CAMEX Technologies goes through the installation processes only after a complete powder coating procedure to ensure long lasting quality and durability.
- Once product installation is done at our facility, the finished product undergoes a rigorous quality check process to ensure reliability, durability, and compliance with all prescribed industry standards and regulations.

OUR CORE PRODUCTS

LV Switchboards - Up To 10000A

■ Power Distribution Board
/ Power Control Centre

■ Automatic Source
Transfer/ Changeover Panels
(ATS/AMF Panels)

■ DG Synchronising
/ Load Sharing Panels

■ Thyristor Switching Power
Factor Correction Panels (APFC)

■ Motor Control Centre
/ Starter Panels

■ AC/DC Drive Panels

■ Control Relay Panels

■ Feeder Pillar

■ AC/DC Distribution Boards

■ HVAC/ AHU Control Panels

■ Variable Speed Drives (VFD)
/ Soft Starter Panels

■ PLC Control Panels
/ Automation Panels

■ Instrumentation Panels
/ Protective Relay Panels

■ Street Lighting
Control Panels

■ Metering Cabinets
/ Panels/ Kiosks

- Fire Fighting System Panel Boards

- SS/ MS Enclosures

- Marshalling Boxes

- Control Desks/ Mimic Panels

- Customised Weather Proof Panels

- Cable Trays & Trunking

- Metal Enclosed LT Bus Ducts up to 8000A

PLC Control, Automation & System Integration Panels

- Process Industries

- Paralleling/ Synchronising Transformer/ DG Sets

- Pumps, Water / Waste Management (ETP/WTP/STP)

- HVAC Equipment Controls

- Load Management & Sharing of Power Sources

- Intelligent MCC for Plants / Industries

- Scada & Process automation

OUR CORE PRODUCTS

MV Switchboards / HT Panels

- 3.3 kilovolts (kV) to 36 kV
– (3.3/6.6/11/ 33) KV VCB panels

- 630/800/1250/1600
rated current

- 20/26.3/40 Amp
Short Circuit Current

- Indoor / Outdoor Type

- Bus Bar - Aluminium / Copper

- Extensible
/ Non-Extensible Type

- HT metering Kiosks

- Control Relay Panel

One of our core USPs is the fact that we value our customer requirements to the point that every panel board we manufacture are customized as per feedback and requirements.

Our experienced design team work closely with the customers to understand and evaluate their requirements and all designs are shared for approvals before manufacturing commences.

Once the designs are approved, our design team works closely with our production team to ensure all aspects of the designs are communicated effectively to aid in the manufacturing process. The manufactured products then undergo a quality check specified by leading global agencies and local regulatory authorities.

camex
SURFACE COATS
COLOURING YOUR NEEDS

Introducing CAMEX Surface Coats, our specialized unit in surface finishing. We provide world class surface treatment for panel boards of any size and shape. Our facility is setup within 8000 Sq. Ft of area and armed with state – of – the art equipment and the most advanced processing technologies in Powder Coating, Poly Urethane Coating, Floro Carbon Coating (PVDF) & Wood Grain Coating.

Our Service Guarantee

At CAMEX Technologies, we take extreme pride in customer service and it reflects in our large and growing list of clientele. To ensure 100% quality and adherence to customer satisfaction, we offer:

24x7, 365 Days

customer support with minimum turnaround time.

After sales and service support

Emergency calls and service guarantee

Annual Preventive Maintenance/
Service Contracts

Consultation on existing installations/Retrofit /Modification & Expansion oriented jobs
